**Prepositions**

A preposition is a word used to link **nouns, pronouns,** or phrases to other words within a sentence. They act to connect the people, objects, time and locations of a sentence. Prepositions are usually short words, and they are normally placed directly in front of nouns. In some cases, you'll find prepositions in front of **gerundverbs**.

SIX Preposition rules-

1. A preposition must have an object - All prepositions have objects. If a "preposition" does not have an object it is not a preposition—it's probably an adverb. A preposition always has an object. An adverb never has an object.
