

## Screen Shot of Website of Vriddhi Software displaying the content covered

The screenshot shows a web browser window with the URL `vriddhisoftware.com/ERPModules/library-management.aspx`. The page features a dark navigation bar with the Vriddhi logo and buttons for Home, About Us, College ERP, ERP Modules, Services, Blog, and Contact Us. The main heading is "Library Management System".

### Library Membership

Membership is provided to every student and faculty member. By using the member's data Librarian can generate the ID card for the member and the library management software will generate a Barcode for the member which will be helpful for future transactions.

This will help to reduce the manual work (on papers) to maintain member's records.

### Books

This library automation software helps to keep track of all the existing books. There will be a unique Id for every book. Barcode will help in Issue-return functionality.

While issuing a book, a librarian will scan the barcode in the system and an entry will be made into the system for the specific book against the specific student or faculty member.

A librarian can define the number of books that can be issued to a specific member in the system.

The screenshot shows the same web browser window, displaying the continuation of the Library Management System content.

A librarian can define the number of books that can be issued to a specific member in the system.

The system will send auto-generated reminder mails to the members when the expiry date will be on the door.

Members can return the book or they can renew the book by logging into the system.

There will be some renewal limit after which members have to return the book or a fine will be applied.

Fine for late return or loss of item will be defined into the system. A total fine will be calculated into the **fee management system**.

Members will be able to access the system by using their unique Ids.

OPAC Library (Online Public access catalog) provides search options for the student by Title, Author, Publisher, Book Editor, Edition Year, and Subject.

Web OPAC library management system provides Search option by Accession No., Title, Author, Publisher, Place, Book Editor, Editor Year, Pages, Copies, Volume No., Sources, Rate, Class No, Subject, Invoice, Remarks for a librarian.

This library management software is loaded with some important library functionalities like Book Accession, Periodical Accession, and Disc Accession. After accessioning the books and periodicals are ready for circulation.
